Tungsten clip notes

To: "Haniff, Isaac J" <isaac.j.haniff@vanderbilt.edu>

I took a look at one of the metal clips for tungsten probes under a microscope (a microscope with a calibrated ruler in the view). The spring portion is 0.25 mm thick, in case you need to design any similar clips for other labs. (The clearance between the flats is 0.05 mm, rather than the 0.1 mm I'd indicated on my guess-drawing, but that's not a critical dimension.)

I'm going to be sending out requests for quotes for more clips made by EDM at some point; I'll let you know what my experiences are like with that.

Regards,
-Christopher Thomas
